Abstract	i
Zusammenfassung	iii
Acknowledgements	v
List of Symbols	vii
List of Abbreviations	ix
List of Figures	xv
List of Tables	xix
1 Introduction	1
1.1 Acquisition of sensed data	1
1.1.1 State of the art of sensing and self-powered sensors . . .	2
1.1.2 Sense-log device concept	6
2 Theory	9
2.1 Thermoelectric devices	9
2.2 Memristive devices	12
2.2.1 General overview	12
2.2.2 Conduction mechanisms	14
2.2.2.1 Ionic conduction	15
2.2.2.2 Electronic conduction	17
2.2.2.2.1 Electrode-limited	18
2.2.2.2.2 Bulk-limited	19
2.2.3 Memristor types	21
2.2.3.1 Electrochemical metallization memory	21
2.2.3.2 Valence change memory	22
2.2.3.2.1 Filamentary VCM	22
2.2.3.2.2 Interface-type VCM	23
2.2.3.3 Other mechanisms	24
2.3 Conclusions	25

3	Fabrication and characterization	27
3.1	Fabrication of memristive devices	28
3.1.1	Microfabrication of templates	28
3.1.2	Electrochemical deposition overview	31
3.1.2.1	Electrodeposition of bismuth selenide - literature review	34
3.1.2.2	Electrochemical deposition setup	34
3.1.2.3	Cyclovoltammetry	37
3.1.2.4	Deposition types and applied signals	39
3.1.2.5	Tuned electrodeposition parameters	42
3.1.3	Planarization and Top contact formation	44
3.1.4	Summarized process flow for memristive devices	47
3.2	Fabrication of Sense-log devices	47
3.2.1	Design features	48
3.2.2	Sense-log process flow	50
3.3	Device characterization	51
3.3.1	Memristive device characterization	52
3.3.2	Sense-log characterization	54
3.4	Summary of the fabrication chapter	56
4	Electrodeposited bismuth selenide memristive devices	57
4.1	Overview	57
4.2	Current voltage characteristics	57
4.3	Amplitude- and frequency-dependent current-voltage characteristics	61
4.4	Pulsed switching speed	63
4.5	Retention	64
4.6	Endurance	67
4.7	Comparing memristive devices	69
4.7.1	Diameter dependency	69
4.7.2	Thickness dependency	70
4.7.3	Selenium content dependency	71
4.8	Temperature effects	72
4.9	Top electrode investigations	74
4.10	Memristive behaviour of electrodeposited $Ag/Bi_2Se_3/Au$ memristors	78
4.11	Comparison to the SoA and the desired sense-log parameters	81
5	Sense-log devices	85
5.1	Sense-log theoretical overview	85
5.1.1	Non-ideal generator and load	86
5.1.2	Self-rectifying behaviour	88
5.2	Theoretical considerations and tailoring to applications	88
5.2.1	Thermoelectric properties of TE and MEM optimized deposits	91

5.2.2	Evaluation of the deposits for use in a sense-log device	91
5.3	Memristor tuning for sense-log devices	93
5.3.1	Memristive properties of TE and MEM optimized deposits	93
5.3.2	Optimizing memristors	95
5.4	Sense-log concept operation	97
5.5	Conclusion	100
6	Conclusions and Outlook	103
6.1	Conclusions	103
6.2	Outlook	104
6.2.1	Improving memristive behavior	104
6.2.2	Sense-log outlook and applications	106
6.2.2.1	Dual sensor sense-log concept	106
6.2.2.2	Multi-level configurations	107
6.2.2.3	Wireless readout	108
6.2.2.4	Potential applications and expansion to other sensing fields	108
A	Appendix A - Fabrication	111
A.1	Microfabrication details	112
A.2	Electrochemical setup	113
A.3	Supporting measurements	115
B	Appendix B - Sample reference	117
C	Appendix C - Datasheets	119
	Bibliography	121
	Publications	141
	Curriculum Vitae	145
