Acknowledgments	v
Abstract	vii
Zusammenfassung	xi
1 Introduction	1
2 Design of Electrically Pumped VECSELS	7
2.1 Semiconductor Laser Model	8
2.1.1 Electro-Thermal Device Equations	8
2.1.2 Optical Modeling	13
2.2 DBR Modeling	16
2.3 VECSEL Layout	23
2.3.1 Mirror and Contact Design	24
2.3.2 Cap Layers, Tunnel Junctions, and Oxides . . .	28
2.3.3 Gain and Absorber Regions	33
2.3.4 Design Guide Lines	35
3 Mode Locking in VECSELS	39
3.1 Fundamentals of Mode Locking	40
3.1.1 Laser Operation Modes	40
3.1.2 Passive Mode Locking	42
3.1.3 Saturable Absorber Mirror	44
3.1.4 Gain and Dispersion	46
3.2 Simulation of Mode Locking	48

3.2.1	Challenges and Previous Work	48
3.2.2	Electro-Optical Device Model	50
3.2.3	Model Extensions	59
4	Mode Locking Simulation in Time Domain	63
4.1	Analytical-Finite Difference Time Domain Method . .	64
4.1.1	Model Formulation	64
4.1.2	Incorporation of the Susceptibility	65
4.1.3	Analytical Replacement of the External Cavity	68
4.1.4	Numerical Implementation	75
4.2	Time Integration of Ordinary Differential Equations .	75
4.2.1	Model Formulation	76
4.2.2	Incorporation of the Susceptibility	77
4.2.3	Source Implementation	79
4.2.4	ODE Solvers	79
4.2.5	Numerical Implementation	81
4.3	Simulation Results	82
4.4	Discussion	90
5	Mode Locking Simulation in Frequency Domain	93
5.1	Incremental Harmonic Balance	95
5.2	Formulation of the Device Model	100
5.2.1	Wave Equation	100
5.2.2	Separation of Linear and Nonlinear Parts . . .	103
5.2.3	Carrier Rate Equation	104
5.2.4	Incorporation of the Susceptibility	106
5.3	Numerical Implementation	112
5.3.1	Homotopy	112
5.3.2	Parametrization and Step Size	113
5.3.3	Predictor	114
5.3.4	Corrector	115
5.3.5	Remaining Tasks	116
5.3.6	About the Solver	116
5.4	Simulation Results	117
5.5	Discussion	122

6 Conclusion and Outlook	125
6.1 Major Results	125
6.2 Future Work	127
A The Z-Transform	129
B The Analytical Signal	133
C Complex Differentiability	135
D Fourier Series and Discrete Fourier Transform	139
List of Abbreviations and Symbols	141
Bibliography	149
Curriculum Vitae	165
